

Premium Series Wet/Dry Vacuum

The **Crusader Premium Series Vacuums** has been designed so that you can mix and match the power head and tank options to get the performance and capacity you need. There are 4 powerful power head options to choose from along with a 10 or 15 gallon tank option. The premium series also has a power nozzle outlet on the dome shaped chrome steel head. These vacuums are highly maneuverable and are designed to handle the toughest jobs in almost any environment. They are built for years of trouble free service at an affordable price to meet your budget. The vacuum comes equipped with a wet/dry universal filter bag but for finer dry particles we recommend the following proper filters (4049 coated bag, 4031 filter protector, 4013 disposable paper bag).
