**READ & FOLLOW ALL INSTRUCTIONS,
WARNINGS & CAUTIONS
BEFORE USING THIS AIRMOVER**

This Airmover will afford you many years of trouble-free operating satisfaction, provided it is given proper care. All parts have passed rigid quality control standards prior to their being assembled to produce the finished product. Prior to packaging, the extractor was again inspected for assurance of flawless assembly.

This Airmover is protectively packed to prevent damage in shipment. We recommend that upon delivery, unpack the unit and inspect it for any possible damage.

Only a visual examination will reveal damage that may have occurred.

If damage is discovered, immediately notify the transportation company that delivered your extractor. As the shipper, we cannot file a claim for any damage. You must originate any claim within 5 days.

This manual is for your protection and information. **PLEASE READ CAREFULLY** since failure to follow precautions could result in discomfort or injury.

OPERATING**

SAVE THESE INSTRUCTIONS

IMPORTANT SAFETY INSTRUCTIONS

- 1) DO NOT** leave Airmover when plugged in. Unplug from the outlet when not in use and before servicing.
- 2) To avoid electric shock, DO NOT** expose to rain. Store indoors.
- 3) This is NOT** a toy. Close attention is necessary when used around or near children.
- 4) Use only** as described in this manual. Use only manufacturer's recommended attachments and accessories.
- 5) DO NOT** use with damaged cord or plug. If extractor is not working as it should, because it has been dropped, damaged, left outdoors, or dropped into water, contact an authorized service center or the factory.
- 6) DO NOT** handle plug with wet hands.
- 7) DO NOT** pull or carry by cord, use cord as a handle, close a door on cord or pull cord around sharp edges or corners. **DO NOT** run unit over cord. Keep cord away from heated surfaces.
- 8) DO NOT** unplug by pulling on cord. To unplug, grasp the plug, not the cord.
- 9. Store** Airmover indoors in a dry area.
- 10) DO NOT** put any objects into the openings. **DO NOT** use with any opening blocked; keep free of anything that may reduce air flow.
- 11) Keep** hair, loose clothing, fingers and all parts of body away from openings and moving parts.
- 14) Turn OFF** all the controls before unplugging.
- 16) DO NOT** use where anesthetics or oxygen are used.
- 17) DO NOT** use an extension cord unless absolutely necessary. If an extension cord is used, then wire size must be #14 gauge or larger and should not exceed 50 feet in length. Use only (3) conductor grounded extension to ensure "GROUNDING" protection.
- 18) Replace** damaged or worn parts immediately with genuine original equipment parts to maintain safety and to protect your limited warranty.

The Airmover must be connected to a properly grounded outlet only. (See Grounding Instructions)

GROUNDING INSTRUCTIONS

Electrical equipment must be grounded. If it should malfunction or break-down, grounding provides a path of least resistance for electrical current to reduce the risk of electric shock. This extractor is equipped with a cord

having an equipment-grounding conductor and grounding plug. The plug must be inserted into an appropriate outlet that is properly installed and grounded in accordance with all local codes and ordinances.

If repair or replacement of the cord or plug is necessary, **DO NOT** connect the grounded wire to either flat blade terminal. The wire with insulation having an outer surface that is green with or without yellow stripes is the grounding wire.

GROUNDING METHODS

This extractor is for use on a nominal 120 volt circuit, and has a grounded plug that looks like the plug illustrated-rated in (Fig A). A temporary adaptor that looks like the adaptor illustrated in (Fig B & C) may be used to connect this plug to a 2-pole receptacle as shown in

(Fig B) if a properly grounded outlet is not available.

The temporary adaptor should be used only until a properly grounded outlet (Fig A) can be installed by a qualified electrician. The green color

rigid ear, lug, or the like, extending from the adaptor must be connected to a permanent ground such as a properly grounded outlet box cover. Whenever the adaptor is used, it must be held in place by a metal screw (Fig C).

WARNING:

To reduce the risk of fire, electric shock or injury:
Read all instructions before using this Airmover

When using this Airmover basic precautions
should always be followed, including the following

DANGER:

Improper use of the grounding plug can result in a risk of electric shock.

WARNING:

Improper connection of the equipment-grounding conductor can result in a risk of electric shock. Check with a qualified electrician or service person if you are in doubt as to whether the outlet is properly grounded.

DO NOT modify the plug provided with the extractor. If it will not fit the outlet, have a proper outlet installed by a qualified electrician.

NOTE: In Canada, the use of a temporary adaptor is not permitted by the Canadian Electric Code.

Use this method when with carpeting is glued and you cannot place the Airmover underneath the carpet.

1) Place the Airmover in a corner pointing toward the center of the room.

2) Turn the switch knob to select the speed you want.

3) The air blows over the surface to speed evaporation. The Airmover should be moved periodically as the surface dries.

**DRYING
GLUED CARPET**

I stretch (non-glued) carpet becomes completely saturated due to flooding or pipes breaking, use this method to dry the carpet's backing. Only a professional should perform this procedure.

1) Remove all the furniture from the room.

3) Plug the Airmover into a grounded outlet and turn it **ON**. This forces the air under and through the carpet to speed drying time. The carpet will blow in the center.

2) Lift an edge of the carpet and slide the exhaust side of Airmover under the carpet.

4) Remove the Airmover when the carpet is dry and stretch carpet back into place.

**DRYING
FLOODED &
STRETCHED
CARPET****WARNING:**

DO NOT place the Airmover in standing water.

PROBLEM: Streaking, uneven or no spray from jets.**Possible Cause**

- 1)** Fuse blown or circuit breaker tripped.
- 2)** Faulty **ON/OFF** switch.
- 3)** Loose wiring.
- 4)** Faulty motor.

Possible Solution

- 1)** Have Airmover checked by an Authorized Service Center
- 2)** Replace switch.
- 3)** Trace and repair.
- 4)** Replace motor.

**TROUBLE
SHOOTING
GUIDE****PROBLEM: Loss of vacuum.****Possible Cause**

- 1)** Intake screens or exhaust grill blocked.

Possible Solution

- 1)** Remove debris blocking air flow and let cool.
