PREDATOR CX3

IMPORTANT SAFETY INSTRUCTIONS

READ AND UNDERSTAND ALL INSTRUCTIONS BEFORE OPERATING OR SERVICING MACHINE

DANGER!

Failure to Observe These Instructions Can Cause Personal Injury to Machine Operator, By-standers or Possible Machine Damage.

- NEVER attempt to service or perform maintenance functions while machine is plugged into an electrical outlet.
- ALWAYS unplug machine before attempting to service the motorized brush attachment.
- NEVER operate in standing water. NEVER expose to rain. ALWAYS store indoors.
- **NEVER** overfill recovery tank or allow water to enter vacuum standpipe. This will cause damage to the vacuum motor and possible electrocution.
- **NEVER** operate machine with a cut, abraded or taped cord.
- **NEVER** operate machine with a broken grounding blade on the plug.
- ALWAYS replace the entire cord when the cord or plug is damaged in any manner.
- NEVER handle the machine, cord or plug with wet hands.
- **NEVER** drop or insert any object into any machine opening.
- **ALWAYS** keep face, fingers, hair or any other body part, or loose clothing away from any machine opening or any moving part, particularly the revolving brush.
- **NEVER** leave the machine unattended when plugged in. Unplug the machine from the electrical outlet when not in use.
- ALWAYS turn the machine off before unplugging it from the electrical outlet.
- **NEVER** operate this machine in the presence of flammable or combustible liquids or fumes.
- When any electrical motor, switch, cord or plug service is required, maintenance should only be done by an authorized service station, an electrician or other qualified persons.
- **NEVER** operate this machine if it is not working properly, if it as been dropped, damaged, exposed to weather, or dropped into water. Return the machine to a service center for examination and repair.
- NEVER operate this machine with any air opening blocked. Keep all air openings free of dust, lint, hair, ect
- **NEVER** operate this machine without solution tank filter screens or vacuum standpipe filter screen in place or if they are clogged. Clean all filter screens after every use.
- ALWAYS store this machine indoors. Protect it from rain or snow.
- NEVER spray the top of the machine with liquids.
- **DO NOT** pull or carry this machine by the electrical supply cord, use the cord as a handle, close a door on the cord, pull the cord around sharp edges or corners, or expose to heated surfaces.
- NEVER disconnect the plug by pulling on the cord. To disconnect the cord from the outlet grasp the plug, not the cord.
- ALWAYS unplug this machine before attempting to service.
- **ALWAYS** use a defoamer which will prevent a buildup of foam in the recovery tank. If a defoamer is not used, the motor can be damaged from shampoo being pulled into the vacuum motor.

nss

INFORMATION & OPERATING INSTRUCTIONS

DO NOT OPERATE MACHINE UNTIL YOU HAVE READ THIS SECTION IMPROPER USE OF THE PREDATOR CX3 SPOTTER WILL VOID THE WARRANTY

- 1. Keep all filters clean. Do not operate machine if filters are clogged.
- 2. All extension cords must be three wire, and no longer than 50 feet.
- 3. Do NOT let the pump run dry.
- 4. Always use defoamer in the recovery tank when foaming occurs to prevent damage to vacuum motor.
- 5. Always empty the recovery tank when refilling the water tank(s).
- 6. Keep the machine, tools, and hoses from extremes in temperature. Do not allow the machine, tools or hoses to freeze.

INSPECTION:

Carefully unpack and inspect the PREDATOR CX3 SPOTTER for shipping damage. Each unit is tested and inspected before shipment. Any damage incurred during shipping is the responsibility of the carrier, who must be notified immediately.

CLEANING SOLUTIONS:

We recommend the use of liquid cleaning detergents.-Powdered chemicals may be used, but unless mixed very thoroughly, they could cause a build-up in the pump, the lines, quick couplers, etc. A pH of between 7 and 9 is recommended to avoid premature pump wear. Damage caused by powdered chemicals or by the use of harsh chemicals (very high or very low pH) would void the warranty.

MAINTENANCE:

Prior to each job, inspect the filters in the water tanks. Clean as necessary. Pump damage may occur if filters become clogged or unable to filter debris. Lubricate wheels and latches, as needed. The pump and vacuum motors do not require any maintenance.

The body can be cleaned with a general purpose cleaner and protected with a silicone-based product like Armor All®.

FEATURES:

Solution Tanks:

The PREDATOR CX3 SPOTTER has the unique design feature of having two 1-gallon solution tanks. This allows you to have cleaning solution in one tank and clean water for rinsing in the other tank. Simply turn the valve on the machine to switch from one tank to the other. There is no need to empty your detergent tank, clean it, and refill it with water for the rinse cycle.

Vacuum Tank:

The vacuum tank holds more liquid than the total of both the holding tanks, so you can easily clean an area and rinse it without the need to empty your recovery tank. When you refill your holding tanks, simply remove the vacuum hose from the recovery tank and dump the water out through the vacuum inlet spout.

Caution: To prevent damage to the vacuum motor, do not let the water level in the recovery tank exceed 3/4 full. Water temperature must not exceed 60°C (140°F).

Caution: When moving the machine with water in any of the tanks, do not tip the machine past a 30 degree angle to avoid spilling water into the vacuum chamber and to avoid damaging the motor.

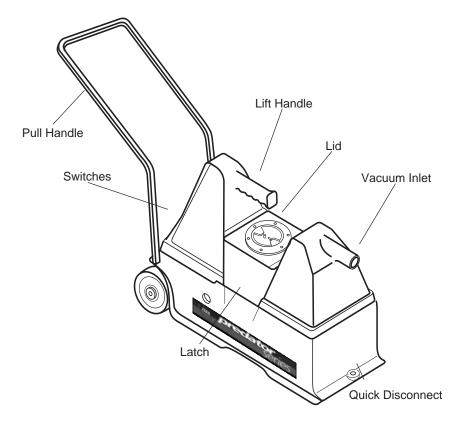

SET-UP:

- 1. Open the latches and remove the recovery tank from the machine.
- 2. Fill the solution tanks -- one tank will hold your diluted cleaning chemical and the second tank will hold clean water. **NOTE:** Water temperature must not exceed 60°C (140°F).
- 3. Place the recovery tank back onto the base, and secure the latches. Make sure the screw-in access lid is in place and tight.
- 4. Attach the vacuum hose to the vacuum inlet on the recovery tank.
- 5. Connect the solution line to the quick coupling on the rear of the PREDATOR CX3 SPOTTER base.
- 6. Attach the cleaning tool to the 10' Vacuum Hose/Solution Hose assembly.
- 7. Turn the knob on the 3-way switch to the desired tank.
- 8. Turn the rocker switch on. This will start the pump and the vacuum.
- 9. Press the lever on the tool to begin spraying.

NOTE: It may take a few seconds for the solution to reach the spray tip. The tool will automatically suck up the sprayed solution as the tool passes over the wet area.

NOTE: When switching from one tank to the other tank, it may take a few seconds of spraying for the solution in the selected tank to reach the spray tip.

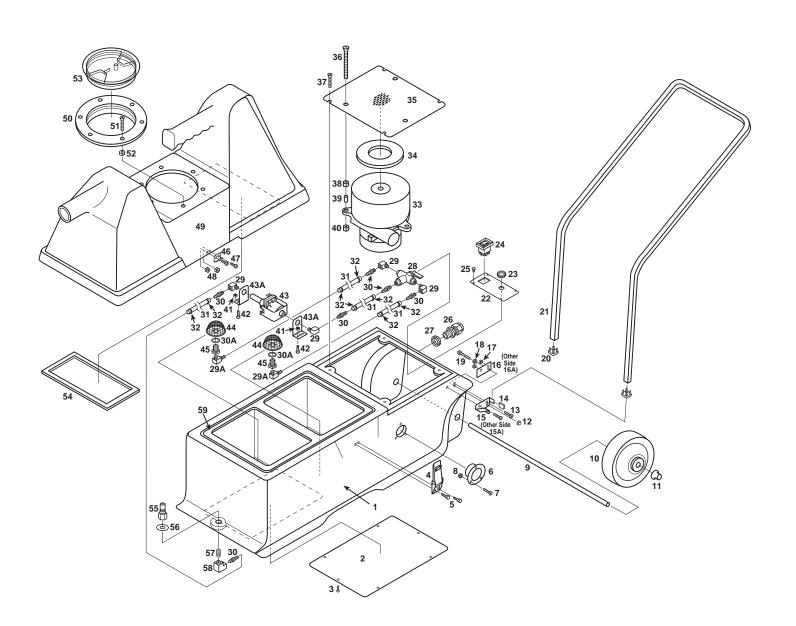

10. When finished with the job, disconnect the hoses from the Spotter, remove and empty the recovery tank, then dump the water out of the tanks and clean them.

PREDATOR CX3 SPOTTER PARTS LIST

| ITEM# | PART# | DESCRIPTION | ITEM# | PART# | DESCRIPTION |
|-------|---------|---------------------------------------|--------------------|---------|---------------------------------------|
| #1 | 4096261 | Base, Holding Tanks | #32 | 4096061 | Hose Clamp |
| #2 | 4096131 | Plate, Bottom Cover | #33 | 4091211 | Vacuum, 2-Stage, 120V |
| #3 | 4090521 | #6 X 1/2" Screw, Panhead, S/S | | 4092101 | Vacuum, 2-Stage, 240V |
| #4 | 4091251 | Latch | #34 | 4091431 | Gasket, Vacuum |
| #5 | 4090571 | 10-32 X 3/8" Screw, Panhead, S/S | #35 | 4096211 | Plate, Vacuum Mount |

PREDATOR CX3 SPOTTER

COMMON STAINS AND CLEANING TREATMENTS

TREATMENT METHODS

First: Remove excess material by blotting to absorb liquids, or by scraping with a dull edge

(butter knife) is a solid.

Second: Clean the remaining stain as directed by the chart below. Always follow the direction

on the container. Apply the cleaning material directly to the stain (avoid over wetting the carpet or upholstery), then remove the loosened stain material with a white ab-

sorbent cloth or tissue.

Third: When the carpet is dry, gently brush the carpet pile to restore its appearance.

Note: Treat unknown stains with a volatile solvent first and follow with other agents as re-

quired. If you are uncertain of the effect of the cleaning agent on the carpet fiber or

dye, test on an inconspicuous area first.

<u>STAIN TYPE</u> <u>TREATMENT MATERIAL</u>

Asphalt Volatile solvent/detergent

Beer Liquid detergent, White vinegar

Berry stain Liquid detergent, Ammonia 3-6%, Water

Bleach Liquid detergent, Water

Blood (dried) Warm detergent, Ammonia 3-6%, Water

Blood (wet) Liquid detergent, Water

Butter Volatile solvent
Catsup or Mustard Liquid detergent
Chewing gum Volatile solvent

Chocolate Liquid detergent, Ammonia water

Coffee Detergent, White vinegar, Volatile solvent

Cola drink

Creme de Menthe (green)

Egg (raw)

Liquid detergent

Liquid detergent

Food dye Liquid detergent, Water

Furniture dye or polish Paint/Oil/Grease remover, Detergent

Gravy Liquid detergent

Lipstick Paint/Oil/Grease remover

Mascara Paint remover, Volatile solvent, Detergent, Water

Milk Liquid detergent

Orange drink Liquid detergent, Water

Shoe polish Heated iron into clean towel, Volatile solvent

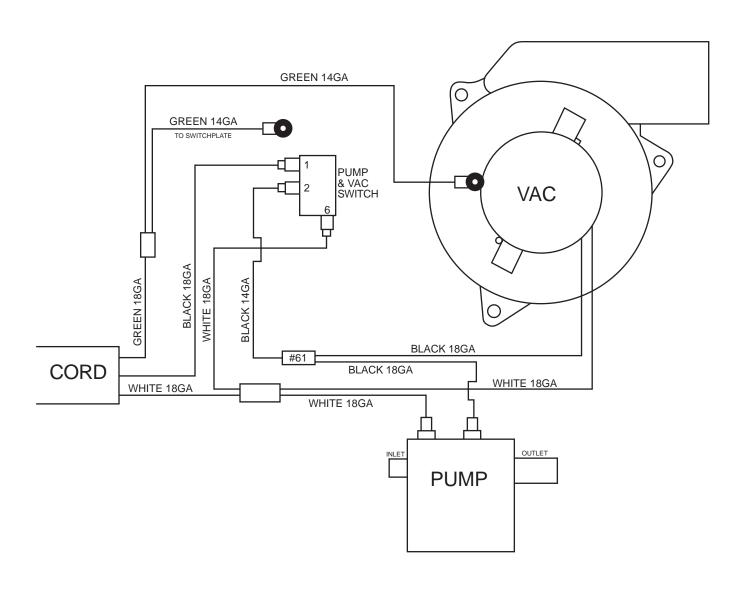

Tea Liquid detergent
Tomato Juice Liquid detergent

Urine Liquid detergent, Water

Vomit Warm detergent, Water, White vinegar

Wine Liquid detergent, Ammonia 3-6%, Water, Vinegar
